AI Use Disclosure

This work was authored by Taveau D'Arcy.

AI tools were used solely as drafting and editing assistants for clarity, grammar, and structure. All doctrine, theology, biblical interpretation, prophetic insight, and ministry direction originate entirely from the author.

John 16:13 — KJV

“Howbeit when he, the Spirit of truth, is come, he will guide you into all truth: for he shall not speak of himself; but whatsoever he shall hear, that shall he speak: and he will shew you things to come.”

Daniel 2:28 — KJV

“But there is a God in heaven that revealeth secrets, and maketh known to the king Nebuchadnezzar what shall be in the latter days. Thy dream, and the visions of thy head upon thy bed, are these.”

About the Author

Future Focus-Beyond AI

AI Ethical Transparency Statement

Note from the Author

I approached artificial intelligence with the same questions many Christian leaders are asking today — not questions of doctrine, but questions of intrinsic safety, deep integrity, mature responsibility, decisive clarity, and transparency.

My calling has always emphasized Apostle Paul in Philippians 2:12: “each person should work out their own salvation with fear and trembling,” with no pressure to conform to anything other than the Most High God. This entails active participation in Bible study, careful observation of ministry culture, and abiding faithfulness to the teachings of Jesus Christ and the First Church, mainly prior to Constantine, along with corporate body unity and respect for all.

Because of this, I am cautious with every new tool introduced into Christian communication.

I do not seek doctrine from AI.

I do not seek revelation from AI.

I do not rely on AI for spiritual authority.

I use it only as a modern scribe — an assistant for wording, structure, and clarity — while remaining fully responsible before God and before people for everything written and taught.

This small book exists to bring peace, truth, and understanding to Christian leaders navigating a rapidly changing technological landscape.

To Each Reader

Wisdom, Discernment, and Personal Responsibility in an Age of AI

Artificial intelligence is evolving rapidly, and public commentary about it shifts almost weekly. Some voices present AI as a harmless convenience; others portray it as an existential or spiritual threat. Many of these claims — on both extremes — are driven more by speculation, emotion, or online amplification than by careful understanding.

This book does not ask the reader to adopt the author's conclusions blindly.

Rather, it invites each reader to:

- think critically
- evaluate wisely
- pray discerningly
- take personal responsibility for how any technology is used

No tool — whether the printing press, radio, television, internet, or AI — removes moral agency from the human being using it.

Technology does not absolve responsibility, nor does it replace wisdom, logic, Bible study, or knowing where reality begins and ends.

The Search for a Balanced Position

AI is neither inherently holy nor inherently evil, yet it holds potential for both benefit and misuse. It is always directed toward something, whether helpful or harmful.

Participating in AI, in the author's opinion, requires an even keel, watchfulness, and awareness of undercurrents or anti-Christian influences. We are not naïve. Should AI shift in a deeply concerning direction, we would discontinue its use quickly.

If and when a particular AI proves consistently unreliable or misleading, it is up to each person — with the Lord's help and godly wisdom — to decide responsibly.

For now, AI is a tool: powerful, imperfect, and limited, yet interesting. No reader is encouraged to follow this book blindly. It is written from experience using AI, mainly ChatGPT and a few others.

The author remains actively engaged online for business and ministry, observing culture, church life, and Christian trends closely.

Like every tool, each AI's value or harm is determined by:

- who uses it
- how it is used
- why it is used
- the boundaries placed upon it

This book advocates neither fear nor fascination, but measured, accountable use governed by conscience, maturity, and truth.

Remain watchful. Share observations with trusted peers. "God is busy revealing" (Daniel 2:28), and He does so as we follow and know Him.

John 16:13 reminds us that when the Spirit of truth comes, He guides into truth and speaks of what is to come.

This guidance is for the present moment. It may not always remain permanent, and therefore we stay attentive and discerning.

Choosing a Personal Perspective

It is reasonable for believers to consider that emerging technologies, including artificial intelligence, exist within the broader landscape preceding end-time events. However, Scripture does not instruct believers to fixate on tools or timelines, but to remain watchful, grounded, and faithful.

AI does not replace Bible study, prayer, discernment, or a personal relationship with the Lord Jesus Christ.

Trust in Christ, knowledge of Scripture, and obedience to the Holy Spirit remain central.

Technologies may come and go, but faith, wisdom, and personal responsibility before God must always remain primary.

I abide in the Lord and acknowledge concern without declaring prophecy. I avoid labeling AI as the Antichrist. I keep authority rooted in Christ and Scripture.

This allows the issue to be weighed calmly rather than driven by fear, hurried rhetoric, or accusations.

This perspective is offered respectfully as a balanced and quality view grounded in sincere ministry motives. It is safe for leaders and laypeople to discuss thoughtfully.

The bottom line is simple: you must do what God directs you to do, just as I must do the same. Again, Philippians 2:12 calls each person to work out their salvation with fear and trembling.

As I conclude this section, note the non-authoritarian heart behind this work. It leaves room for watchfulness without obsession.

To the best of my understanding and awareness:

I do not dilute faith.

I do not elevate technology.

I do not surrender discernment.

I seek to keep proper order.

I firmly believe this work presents a balanced, faithful, and wise perspective.

Once more:

- I acknowledge legitimate concern
- I avoid fear and speculation
- I keep Scripture and Christ central
- I preserve personal responsibility and freedom of choice

Introduction

Artificial intelligence has entered public conversation with both excitement and confusion, and also with great concern, particularly within Christian ministry and lay circles. Many claims circulate online — including theories, dire warnings, and emotionally charged reactions shaped by modern pressures.

While some concerns about AI are valid, there is also a tendency toward knee-jerk reactions among sincere pastors and leaders. For this reason, this guide offers a measured leadership perspective.

It has even been observed that one AI company funds media commercials criticizing a competing AI company. This highlights the need for facts, logic, and calm evaluation rather than hysteria.

Christian leaders are right to ask questions, because we carry responsibility before God and before people.

This guide is written for pastors, prophets, teachers, authors, ministry leaders, and Christian communicators who desire clarity, transparency, and ethical confidence.

Its purpose is to provide accurate information, truthful explanation, appropriate disclosure language, and peace of mind — without fear or speculation.

Section 1 — Why Christian Leaders Should Use an AI Disclaimer

Christian leaders carry spiritual, ethical, and doctrinal responsibility.

AI disclaimers are not about fear or legalism — they are about clarity and integrity.

AI disclaimers help you:

- maintain transparency
- build trust with readers
- protect yourself ethically
- prevent future suspicion or accusation
- clarify that you are the theologian
- guard your spiritual authority
- stop rumors before they begin
- demonstrate truthfulness in a technological age

As of 2025, there is no legal requirement for pastors or Christian writers to label AI use in written content.

However, voluntary transparency demonstrates:

- integrity
- honesty
- accountability
- leadership maturity

AI disclaimers help protect your ministry and honor the Lord.

Only YOU — the Christian leader — are responsible for:

- knowing doctrine and Scripture
- theology
- prophetic insight

- biblical interpretation
- spiritual counsel

AI cannot replace reading the Bible directly, nor can it replace fellowship with believers, honest dialogue, or relational learning with real people.

AI also does not replace personal relationship with God through Jesus Christ.

It is not God, not His Spirit, and not His voice — even if interacting with it may sometimes feel conversational.

AI should never be used as a source of doctrine. As used by this author, it is approached with alertness and discernment.

The author, having studied and followed the teachings of Jesus Christ and Scripture closely, uses AI primarily to confirm, clarify, or test information already being examined.

In many cases, it is used to analyze teachings and leadership patterns in light of Scripture.

If AI output ever proves inaccurate, correction is welcomed so that truth can be maintained.

The reminder remains:

Each believer must read, know, and understand the Bible personally.

Section 2 — Submitted Selah for Leaders

Using AI with Biblical Discernment and Shepherd Care

I. Opening Pastoral Frame

In every generation, leaders must learn how to use new tools without allowing those tools to shape doctrine or replace dependence on God.

Artificial intelligence is one of those tools.

Like commentaries, concordances, or Bible software, it can assist — but it must never lead.

A shepherd feeds the flock from God’s Word, not from technology.

II. The Biblical Priority of Discernment

1 Thessalonians 5:21 (KJV)

“Prove all things; hold fast that which is good.”

Paul instructs believers to test everything. This includes modern tools.

A leader’s responsibility is not to accept information quickly, but to examine it biblically.

AI must be tested like any other source.

III. Christ Remains the Source

John 15:5 (KJV)

“For without me ye can do nothing.”

No technology can replace abiding in Christ.

AI can arrange words, but it cannot produce spiritual life, conviction, or revelation.

Only the Holy Spirit brings understanding to Scripture.

A leader who depends more on tools than on Christ risks dryness in ministry.

IV. Guarding the Flock from Error

Acts 20:28 (KJV)

“Take heed therefore unto yourselves, and to all the flock...”

Shepherds must remain watchful.

AI reflects human writings, and human writings may contain:

- denominational bias
- theological error
- cultural opinions
- mixed doctrine

Therefore, leaders must filter AI content carefully before sharing it.

Feeding the flock requires doctrinal purity.

V. Wisdom Comes from God

James 1:5 (KJV)

“If any of you lack wisdom, let him ask of God...”

Leaders should pray before using AI for ministry material.

Ask:

Lord, is this accurate?

Lord, does this reflect Your heart?

Lord, is this safe to teach?

Prayer guards the teaching ministry.

VI. Humility in Leadership

Proverbs 11:14 (KJV)

“In the multitude of counsellors there is safety.”

AI should never replace:

- deep Scripture study
- seeking godly counsel
- personal preparation before the Lord

Leaders remain students of the Word.

Technology does not remove the call to study.

VII. Healthy Pastoral Guidelines

A wise leader treats AI as:

Yes- a research assistant

Yes- a grammar helper

Yes- a structure organizer

But never as:

No- a sermon writer without review

No- a theological authority

No- a prophetic voice

No- a spiritual entity

No- a substitute for prayer

VIII. A Shepherd's Model for Using AI

A safe order is:

Seek God first

Study Scripture

Develop the message

Use AI for organization or editing

Re-check everything biblically

Pray again before teaching

This keeps Christ central.

IX. Closing Pastoral Exhortation

Technology changes.

God's Word does not.

Shepherds are called to:

- feed the flock faithfully
- handle Scripture rightly

- walk humbly with God
- guard truth carefully

AI can serve the ministry,
but it must never guide the ministry.

Simple Summary for Leaders

Use AI as a tool.

Trust Scripture as authority.

Rely on the Holy Spirit for discernment.

Remain a shepherd first, a user of tools second.

Section 3 — Addressing the AI Big Confusion

Artificial intelligence has stirred concern within many Christian circles. Much of this is fueled by online speculation, but some concern also arises from observing rapid global and cultural change.

Christian leaders have a valid right to ask careful questions because we carry responsibility before God and before people.

Common concerns include:

- hidden watermarks
- ownership loss
- legal exposure
- privacy invasion
- doctrinal compromise

Online videos often claim:

- AI watermarks your writing
- Google can see what part you wrote
- universities can detect AI use perfectly
- AI stores your prophetic notes forever
- social media owns anything you upload
- AI rewrites your words without permission

Most of these claims are false or exaggerated in ways that create unnecessary fear.

Leaders are right to seek clarity, transparency, and ethical confidence.

This guide is written for:

- pastors
- apostles
- prophets
- teachers
- ministry overseers

- Christian authors
- ministry staff
- Christian media creators

Its goal is to provide, as clearly as possible:

- accurate information
- truthful explanations
- safe disclosure language
- simple legal clarity
- peace of mind
- transparency without fear

This guide explains:

- what AI actually does
- what AI does not do
- how to disclose AI ethically
- how to protect your ministry
- global AI law basics in simple terms
- proper copyright and AI statements
- how to stay above reproach

Section 4 — Where Does AI Get Its Facts?

A Berean Reminder

Acts 17:11 (KJV)

“These were more noble than those in Thessalonica, in that they received the word with all readiness of mind, and searched the Scriptures daily, whether those things were so.”

In simple terms, Scripture encourages believers not to accept claims quickly, but to examine them carefully in the light of God’s Word and the guidance of the Holy Spirit.

1) Where AI Gets Its Answers — A Berean Clarification

The Bereans were commended not for quick acceptance or rejection, but for careful examination. In that same spirit, clarity requires distinguishing between sources of information and sources of truth.

Artificial intelligence is not a person. It does not receive revelation, inspiration, or spiritual understanding. It does not hear from God, interpret Scripture by the Spirit, or possess divine wisdom.

AI produces responses by recognizing patterns in existing human writings such as historical texts and educational materials.

The author asked ChatGPT the following:

Where does AI get its information?

AI systems like ChatGPT are trained on large collections of text, including:

- publicly available books and articles
- educational materials
- licensed data sources
- public-domain texts
- general knowledge content
- curated training data created by human trainers

It does not pull answers from a secret database or a single source. It learns language patterns across many texts.

It also does not automatically browse the internet unless a browsing tool is specifically used.

2) Where Does AI Get Bible References?

Bible content is widely available in:

- public-domain translations such as the KJV
- academic and theological writings
- public-domain commentaries and study materials

AI has encountered significant biblical text during training and can recall verses and themes through pattern learning.

Important clarification:

AI does not “know God” or have spiritual discernment.

It recognizes text patterns and references.

It can quote Scripture, but it does not receive revelation or inspiration.

3) Where Does AI Get Knowledge?

AI knowledge comes from:

- statistical patterns in text
- repeated associations between ideas
- human writing across many disciplines

It predicts what words come next based on patterns in training data.

Therefore it is:

Yes- pattern recognition

Yes- language modeling

No- not personal belief

No- not lived experience

No- not divine insight

4) Where Does AI Get Ideas?

AI does not generate ideas through personal creativity or prayer. Instead, it:

- combines learned patterns
- synthesizes related concepts
- rephrases and organizes information

It functions as a highly advanced text synthesizer, not a spiritual source.

5) A Balanced Christian Perspective

Many Christian leaders find AI helpful for:

- organizing thoughts
- locating verses
- structuring writing
- editing drafts

But they continue to rely on:

Yes- Scripture

Yes- prayer

Yes- Holy Spirit guidance

Yes- sound doctrine

Yes- personal discernment

AI can assist study, but it should not replace spiritual authority or biblical discernment.

Section 5 — How to Safely Use AI in Christian Writing

Best Uses

AI works well for:

- organizing outlines
- summarizing themes
- locating related Bible passages
- grammar and clarity editing
- structuring long manuscripts
- brainstorming ideas for prayerful evaluation

Think of it as a research assistant, not a teacher.

Safe Boundaries

Always keep these guardrails:

Yes- Scripture has final authority

Yes- prayer comes before publishing

Yes- your discernment leads, not AI

Yes- never treat AI text as revelation

Yes- check theology before quoting

A helpful reminder:

AI can help form words, but the Holy Spirit forms truth.

Practical Workflow

A healthy pattern used by many Christian writers:

Pray

Study Scripture personally

Draft your message

Use AI for polish and structure

Re-check Scripture and doctrine

Complete a final prayerful review

Ministry Point — Verifying Bible References

AI may occasionally:

- mix verse numbers
- quote partially
- blend translations
- misremember context

Verification is important.

Simple Verification Steps

Step 1 — Check the verse directly

Use a trusted Bible:

- printed Bible
- Bible apps such as Bible Gateway, YouVersion, or Blue Letter Bible

Step 2 — Read the context

Always read surrounding verses and, when teaching, the full chapter.

Step 3 — Confirm the translation

If you prefer KJV, verify it is truly KJV.

Watch Carefully For

1. Verses that sound biblical but do not exist
2. Small wording changes that alter meaning
3. Verses quoted out of context

Avoiding Doctrinal Errors When Using AI

Because AI reflects human writing, it may:

- present multiple traditions
- blend viewpoints
- offer neutral summaries
- occasionally reflect weak theology

A Doctrinal Safety Checklist

Before using AI content, ask:

Yes- Does this align with Scripture?

Yes- Is this consistent with historic Christian belief?

Yes- Does this reflect the character of Christ?

Yes- Is this supported by clear Bible teaching?

Yes- Does this promote humility and truth?

A Strong Protection Principle

Clear Scripture interprets unclear Scripture.

Never build doctrine from:

- one isolated verse
- symbolic passages alone
- AI summaries without biblical grounding

A Wise Ministry Approach

Many mature leaders treat AI like:

- a dictionary
- a research index
- a structuring tool

But not:

- a pastor
- a prophet
- a spiritual authority

Simple Summary

AI is a helpful writing and study tool, but:

God's Word is the authority.

The Holy Spirit gives discernment.

Prayer protects doctrine.

Scripture must be checked directly.

Used wisely, AI can support ministry work without replacing spiritual leadership.

Section 6 — Bible-Based Discernment Checklist

(For Evaluating AI Content or Any Teaching)

1) Test Everything by Scripture

1 Thessalonians 5:21 (KJV)

“Prove all things; hold fast that which is good.”

Yes- Compare every idea with the Bible

Yes- Reject anything that contradicts Scripture

Yes- Do not accept something simply because it sounds wise

2) Check the Fruit

Matthew 7:16 (KJV)

“Ye shall know them by their fruits.”

Ask:

Does this lead toward Christlikeness?

Does it produce humility or pride?

Does it promote love and truth?

Good fruit signals good guidance.

Bad fruit signals caution.

3) Seek God’s Wisdom First

James 1:5 (KJV)

“If any of you lack wisdom, let him ask of God...”

Before relying on AI:

Yes- Pray

Yes- Ask for wisdom

Yes- Invite the Holy Spirit’s guidance

4) Guard Against Deception

Colossians 2:8 (KJV)

“Beware lest any man spoil you through philosophy and vain deceit...”

Remember:

Not all intelligent-sounding words are truth.

Not all spiritual language is biblical.

AI reflects human writings, which can contain errors.

5) Stay Rooted in Christ

John 15:5 (KJV)

“Without me ye can do nothing.”

AI can assist research,

but only Christ gives truth and life.

6) Use Multiple Witnesses

2 Corinthians 13:1 (KJV)

“In the mouth of two or three witnesses shall every word be established.”

Yes- Confirm teachings with Scripture

Yes- Check trusted Bible sources

Yes- Do not rely on one AI response alone

7) Maintain a Teachable Spirit

Proverbs 11:14 (KJV)

“In the multitude of counsellors there is safety.”

Yes- Stay humble

Yes- Be willing to re-check

Yes- Invite godly counsel when needed

Section 7 — A Safe AI Policy for Christian Use

Principle 1 — Scripture Is Final Authority

AI never overrides the Bible.

AI assists writing.

Scripture determines truth.

Principle 2 — AI Is a Tool, Not a Teacher

AI is:

Yes- a research helper

Yes- a writing assistant

Yes- an organizing aid

AI is NOT:

No- a pastor

No- a spiritual guide

No- a prophet

No- a spiritual authority

No- a source of revelation

Principle 3 — Prayer Before Publication

Before using AI-assisted content:

Pray over your message.

Ask for discernment.

Check doctrinal accuracy.

Principle 4 — Verify All Scripture

Always:

Yes- look up verses yourself

Yes- confirm translation

Yes- read context

Never assume AI quoted perfectly.

Principle 5 — Avoid Overdependence

Do not allow AI to:

Replace Bible study

Replace prayer

Replace Spirit-led reflection

Replace personal responsibility

Principle 6 — Maintain Transparency

If publishing:

Yes- acknowledge AI assistance when appropriate

Yes- be honest about its role

Yes- maintain authorship integrity

Simple Ministry Summary

AI can help organize words.

Only God gives truth.

AI can assist research.

Only Scripture is authority.

AI can suggest ideas.

Only the Holy Spirit gives discernment.

Section 8 — Why Christian Leaders Should Use an AI Disclaimer

Christian leaders carry spiritual, ethical, and doctrinal responsibility.

AI disclaimers are not about fear or legalism — they are about clarity and integrity.

AI disclaimers help you:

- maintain transparency
- build trust with readers
- protect yourself ethically
- prevent suspicion
- clarify that you are the theologian
- guard your spiritual authority
- stop rumors before they begin
- demonstrate truthfulness in a technological age

As of 2025, there is no legal requirement for pastors or Christian writers to label AI use in written content.

Voluntary transparency demonstrates:

- integrity
- honesty
- accountability
- leadership maturity

AI disclaimers help protect your ministry and honor the Lord.

Section 9 — What AI Is — What AI Is Not

AI IS:

- a typist
- a scribe
- a drafting helper
- a grammar cleaner
- a structural organizer
- a summarizing tool
- a formatting assistant
- an image generator (based on your instructions)

AI can help you:

- improve clarity
- format text
- condense long ideas
- organize chapters
- polish sentences

AI is a tool.

AI IS NOT:

- a fortune teller or biblical prophet
- a revelator
- a discerner of spirits
- a theologian
- a Bible interpreter
- a spiritual authority
- the Holy Spirit
- a replacement for revelation

Only YOU — the Christian leader — are responsible for:

- doctrine
- theology

- prophetic insight
- biblical interpretation
- spiritual counsel

AI cannot replace spiritual authority.

AI should never be used as a source of doctrine.

Section 10 — Answering the Big Fears Christians Ask About AI (2025)

Here are some of the most common concerns Christian leaders express — along with clear explanations based on current understanding (as of 2025).

Q: Does ChatGPT watermark my writing with invisible codes?

A: No.

There are no hidden tags, embedded signatures, or invisible marks inside plain text.

Plain text cannot carry watermarks.

Q: Can Google detect which parts I wrote and which parts were AI?

A: No.

No tool can reliably separate AI text from human text, especially after editing.

Detection tools make estimates and are often incorrect.

Q: Can AI see my local files or revision history?

A: No.

AI cannot see your:

- computer
- hard drive
- Word or LibreOffice edits
- email
- phone
- offline journals

It only sees what you manually paste or upload.

Q: Does AI own my content?

A: No.

You own your ideas, doctrine, writing, and teachings.

Q: Does social media own images I upload?

A: No.

Platforms receive permission to display your content, not ownership of it.

Q: Does the EU require AI labels for Christian writing?

A: No.

Labeling rules mainly apply to:

- synthetic images
- deepfakes
- deceptive political content

They do not apply to sermons, books, devotionals, or ministry writing.

Q: Does China's AI law apply to U.S. ministries?

A: No.

These laws apply only within China or on China-hosted platforms.

Q: Does ChatGPT store prophetic notes or personal revelations?

A: No.

It does not store your private notes or local documents.

Section 11-Top AI Detection & Text Authenticity Tools

1. Turnitin AI Detection – *Industry standard for education*

A major academic integrity platform used by thousands of schools and universities worldwide. It flags AI-generated content and also performs comprehensive plagiarism checks against its massive databases of student papers and internet sources.

2. GPTZero – *Highly trusted AI detector*

One of the most accurate AI content detectors available, widely used by educators and institutions. It analyzes text at sentence and document levels to estimate how much was likely written by AI vs. humans.

3. Copyleaks AI Detector – *AI + plagiarism detection*

This platform detects AI-generated content with high accuracy and also checks for plagiarism, supporting multiple languages and broad text formats.

4. Originality.ai – *Combined plagiarism + AI check*

A tool that simultaneously scans for plagiarism and AI-generated text. It can also scan URLs directly, making it useful for blogs and web content.

5. Scribbr AI Detector – *Student & educator oriented*

Designed to detect if text was created by models like ChatGPT, Gemini, and Copilot with the ability to highlight AI patterns.

6. Pangram AI Detector – *Content authenticity & plagiarism*

A detection tool that helps institutions and publishers assess originality and AI content usage.

7. Winston AI – *Enterprise-level AI detection*

An advanced detector for professional, educational and publishing use that claims very high accuracy and language coverage.

Notes on AI Detection Tools

- **Turnitin** is among the biggest and most globally adopted, especially in academic settings.
- **GPTZero** is often highlighted for its strong performance in detecting AI content across large documents.
- Many of these tools also incorporate **plagiarism detection**, which is valuable when you need to check if text is both original and human-written.

Section 12: How Major Publishers Handle AI

Note: the author asked this directly to ChapGpt

1. AI is treated as a tool, not an author

Large publishers generally allow AI to be used for:

Yes- Brainstorming

Yes- Outlining

Yes- Editing assistance

Yes- Grammar and style cleanup

Yes- Research direction (not final facts)

They do **not** treat AI as a credited author.

The human author remains responsible for:

- Accuracy
- Originality
- Voice
- Final content decisions

2 Disclosure is increasingly encouraged

Many publishers now ask authors to disclose AI use, especially if AI contributed to:

- Drafted text
- Translations
- Illustrations
- Narration scripts

This is about transparency and copyright clarity, not punishment.

Typical requirement:

“Author confirms AI tools were used only as support, with full human oversight.”

3. Copyright concerns drive policy

Copyright law in many countries requires **human authorship**.

If a book is heavily AI-generated, publishers worry about:

- Who owns the copyright
- Whether it is protectable
- Legal risks

So they prefer:

Yes- Human-directed writing

Yes- AI as assistant, not creator

4. Major houses setting examples

Large publishers such as:

- Penguin Random House
- HarperCollins
- Simon & Schuster
- Hachette Book Group

generally:

Yes- Require author accountability

Yes- Review AI use case-by-case

Yes- Emphasize originality and quality

Yes- Protect their authors' IP from AI scraping

Some have even updated contracts to restrict how AI can be used with their authors' works.

5. Self-publishing platforms are more flexible

Platforms like:

- Amazon KDP
- Draft2Digital

allow AI-assisted books but may ask if content is:

- AI-generated

- AI-assisted
- Human-written

Again, the focus is on transparency and preventing spam.

Point: What This Means Practically

Industry norm is becoming:

Human-led, AI-assisted is acceptable.

Fully AI-written with no oversight is discouraged.

Your use (questioning, refining, editing, reclaiming time) fits squarely into “AI-assisted.”

Wider Perspective

Publishing is adapting, not condemning.

This moment in history is similar to when:

- Word processors replaced typewriters
- Spellcheck replaced manual proofreading
- Bible software replaced paper concordances

Tools change.

Authorship responsibility remains.

Section 13 — Who Owns AI-Assisted Content?

One of the biggest questions Christian leaders ask is:

“If AI helped refine wording or correct grammar, who owns the final content?”

The Answer (as of 12/2025)

YOU own it.

Your content remains your intellectual property because:

- the ideas came from you
- the doctrine came from you
- the theology came from you
- the prophetic insight came from you
- the ministry direction came from you

AI Does NOT:

- own your writing
- claim your doctrine
- hold rights to your content
- function as a co-author

AI is a tool, not an author.

You Remain the Owner Of:

- your teachings
- your ministry writings
- your explanations
- your leadership materials

- your prophetic insights
- your Bible studies

AI may help polish wording,
but the message and doctrine remain yours before God and before people.

Section 14 — Revision Language for Updated Articles

When updating older articles, teachings, or blog posts, it helps readers if you include a short note explaining the revision.

Recommended phrases include:

- “Revised for clarity; doctrine unchanged.”
- “Updated wording; message remains the same.”
- “Improved structure for readability; biblical content unchanged.”
- “Refined for clarity; theology unchanged.”
- “Edited for length and accuracy; core message unchanged.”

These short statements:

- prevent confusion
- reassure readers
- demonstrate integrity
- protect doctrinal reputation

They clarify that the message remains the same while the wording has been improved.

Section 15 — Master List of AI Disclosures, Copyright Statements & Website Policies

(Using “John Doe” and “Jane Doe” as placeholders you may replace with your ministry name.)

CATEGORY 1 — ARTICLES / BLOGS / WORDPRESS / SUBSTACK

Professional Version

Section 16 — Global AI Laws for Christian Ministry

(EU, China, USA)

1) GDPR — Europe's Privacy Law

GDPR is not an AI law.

It addresses privacy and personal data such as:

- names
- email addresses
- contact forms

GDPR does NOT require:

- AI labels on text
- watermarking
- AI-use disclosures
- restrictions on sermons, blogs, books, or teachings

If someone provides their email, GDPR requires:

- informing them how it is used
- not selling it
- deleting it upon request

2) EU AI Act & Digital Services Act (DSA)

These laws require labels mainly for:

- synthetic images
- deepfake videos
- AI-generated human likenesses
- deceptive political content

They do NOT target:

- Christian writing
- sermons

- devotionals
- blogs
- leadership books
- doctrinal teaching
- ministry websites

A voluntary AI disclaimer is sufficient.

3) China's AI Labeling Laws

China requires labels for:

- AI images
- AI videos
- AI audio

These rules apply only within China or on Chinese-hosted platforms.

They do NOT apply to:

- WordPress
- Substack
- YouTube
- Instagram
- Facebook
- U.S.-based ministries

4) United States

As of 2025:

- no federal law requires labeling AI text
- no watermarking requirement exists
- no mandate to report AI use
- no restriction on pastors or authors using AI
- no legal barrier to Christian content created with drafting tools

Voluntary transparency reflects ethical integrity.

It is not a legal burden.

5) Summary for Ministers

Christian leaders are NOT legally required to:

No- label every AI use

No- watermark text

No- track revision history

No- reveal prompts

No- add disclaimers to every document

Your content remains:

Yes- fully owned by you

Yes- original

Yes- Spirit-led

Yes- doctrinally yours

Yes- legally safe

Section 17 — AI Misconceptions: What ChatGPT Actually Does and Does Not Do

Many dramatic claims about AI circulate online. This section offers calm clarification.

AI DOES:

- respond to prompts you type
- help with grammar, structure, and clarity
- organize information
- rewrite for smoother reading
- summarize long material
- follow instructions you provide

AI works only with what you supply.
It cannot act independently.

AI DOES NOT:

- read your mind
- access your computer files
- track your revision history
- store prophetic notes
- connect to your email or phone
- watch through your camera
- watermark plain text
- create theological doctrine

AI is not:

- a prophet
- a spiritual being
- a discerner
- the Holy Spirit

AI is a tool — similar to a typewriter, editor, or scribe.

Important Clarification

AI-detection tools used by some institutions:

- cannot reliably identify AI-generated text
- frequently produce false positives
- cannot scan your computer
- cannot isolate which portions are AI
- cannot reconstruct drafts or edits

They estimate only.

Christians are therefore encouraged to walk in:

- wisdom
- truth
- calmness
- discernment

Not fear or superstition.

Section 18 — AI Privacy & Legal Concerns

A Simple Explanation for Christian Leaders

Strong warnings sometimes circulate online suggesting AI conversations are publicly exposed or easily accessed. These claims often create unnecessary fear.

Here is the clear understanding:

1) Your AI conversations are private.

AI tools do not publish your conversations or make them publicly searchable.

Your ministry notes, drafts, and studies are not visible to the public.

2) Legal access is rare and follows standard digital rules.

In serious legal situations, courts may request digital records. This applies to:

- email
- text messages
- phone logs
- bank statements
- cloud storage
- social-media accounts
- digital platforms in general

Such access requires:

- a valid legal case
- judicial approval
- a defined request
- evidence of necessity

For normal ministry use, this is not a concern.

3) This is not AI-specific.

These standards have applied for decades to:

- email
- mobile phones
- browsers
- cloud accounts
- messaging apps
- online services

AI does not create unique legal exposure.

Section 19 — Conclusion

As AI becomes more common — and potentially more complex — Christian leaders need clarity, not confusion. **We remain alert and attentive as technology develops.**

We choose wisdom without fear.

We evaluate carefully and avoid basing views on hearsay, bias, or rumor.

AI remains:

- a tool
- a scribe
- a typist
- a helper
- a drafting assistant

AI is not:

- a prophet
- a spirit
- the Author of Scripture
- the Holy Spirit
- a doctrinal source

Your ministry, theology, prophetic voice, and insight come from the Lord and from your decades of study and leadership experience.

This guide offers:

- trustworthy AI disclaimers
- correct copyright structures
- transparent statements
- global law clarity
- protection from unnecessary fear
- practical wisdom

- peace of mind
- ethical confidence in a technological age

May you walk in integrity, clarity, and courage as you lead God's people amid new tools and new challenges.

Author Invitation to James 3:17 Spiritual Fact, Fruit and Truth Correction

The author welcomes thoughtful correction if any reader believes there is an error in biblical history, theology, or language understanding.

Such correction is invited in a spirit of humility and truth-seeking, not accusation.

James 3:17 (KJV) reminds us that wisdom from above is pure, peaceable, gentle, and open to reason.

The goal is not to win arguments, but to walk in truth and love.

This work invites discernment, not blind acceptance.

Final Note

This booklet is part of the author's ongoing work to equip pastors, prophets, apostles, Christian writers, and leadership teams with tools for ministry clarity and transparency. Her heart is for the Body of Christ to return to relational respect, freedom from domination, and Christlike leadership rooted in First-Church example.

Future resources will expand on:

- biblical leadership foundations
- ethical communication
- First-Church relational models
- technology and ministry integrity
- AI and Christian discipleship
- doctrinal safety in a digital age

May the Lord bless your ministry with wisdom, strength, clarity, and integrity as you serve His people.

About the Author

Prophetic minister Taveau D'Arcy is a veteran Christian leader, composer, writer, and founder of Taveau D'Arcy Creative Leadership.

For over fifty years she has studied Scripture, First-Church patterns, early Christian history, and modern ministry practices across the United States.

Her calling emphasizes:

- cross-body unity
- servant leadership
- non-authoritarian ministry
- doctrinal clarity
- compassion and respect
- Abiding Relationship Theology (A.R.T.) • equipping leaders for integrity in a technological age

A Bigger Focus That's Far More Serious and Beyond This Life and Inventions Like AI

1 Corinthians 2:9–10 (KJV)

9 But as it is written, Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love him.

10 But God hath revealed them unto us by his Spirit: for the Spirit searcheth all things, yea, the deep things of God.”

If the same God who imagined light, galaxies, and the hidden design within every living cell also formed the unseen realms that no telescope or microscope can reach, then our present world is only a small window into a far greater reality. Paul, listening to the Holy Ghost in his day, grasped truths that stretched beyond his time, yet even he knew he was touching only the edges of God's vast wisdom. What we see, hear, and measure on this earth is real, but it is not final. There is a deeper future, a larger Kingdom, and a loving eternal purpose moving beneath the surface of daily life. To pause and consider what lies beyond “this now” is not escapism—it is faith responding to a God whose works always exceed human expectation, inviting us into wonder, humility, and hope.

What Eye Has Not Seen

Planet Earth is just the beginning. And WIFI, AI, movie and video game, science fiction , special effects and cellular, light and sound, also undersea and outer space knowledge makes us aware that there is much more this present now. There is an “eternal reality” and we want many others to be there in heaven with Jesus, after this desperate world has passed.

“Be the Good News”

Here's How: Share Jesus Christ's Authentic Respect

“REAL Respect for the office of EVERY human made in God's image.” Psalm 139 **

**** *Showing each person Jesus Christ's genuine “REAL respect” is the lowest bar in witnessing the Love of Christ.***

Note: “Respecting another person who is made in the image of God and beloved by Him is not the same as “agreeing with,condoning, or endorsing, and/or trusting that person.” And it also goes for that human person and you and me, for they do not have to agree with,condone or endorse you or I.” This is how all society and Christian family, Community, can become safe and wholesome for all kinds of persons, kids-through elders.”

Yes, that's the Core message of Apostolic Taveau D'Arcy Creative Leadership and EORR Cross Body Unity Leadership Move and the Heart of A.R.T. Core: Abiding Relationship Theology (His A.R.T.) Bible Training Perspective

AI Disclaimer — Ethical Transparency

ChatGPT was used only for drafting support, including grammar, clarity, and structural organization.

It did not provide doctrinal, prophetic, or theological content.

The author alone is responsible for all spiritual teaching and biblical interpretation.

AI's role was mechanical, not spiritual.
